

➤➤ X-02 Examination light

The X-02 is designed to be an examination light used in clinics and hospitals. It uses a state of art optics design with the latest LED technology to achieve high luminosity and uniform light spot.

The effective heat management system makes it runs cool and does not cause any heat stress to both physician or patient.

The light head is mounted on a gooseneck which can adjust to any position. Different mountings are available for various installation purposes.
